

# Online store App

Online business huwa ashan

# Login Screen

User get only option of Login with google and email

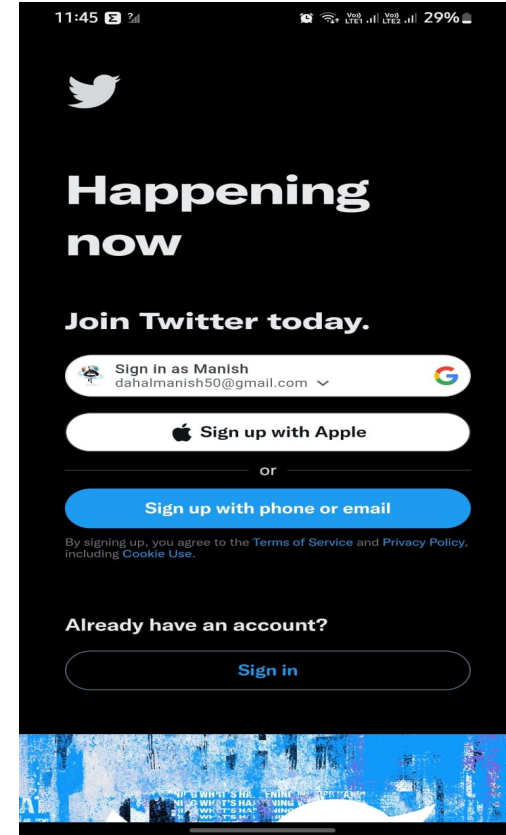

If user login with google we need to verify OTP As well

Logging user email form

- 1) Enter email id
- 2) passwords <button for login >
- 3) For new user like a already have account and instead
- 4) Of pass word will add create password and verify

the user by OTP , We need forgot pass as well

That will also based on Email with OTP user can create new password

# Once login for new user

Will ask user to enter the company details

This details will be showing on company Online store

<business type, category ignore >

Will give 3 extra fields to add about additional

Business details to user like DL No,fssai number

This they will add as per them.
